CAREER OBJECTIVE:

" I am a front-end developer skilled in HTML, CSS, JavaScript, SQL, and React, with a focus on designing and developing scalable, efficient, and user-friendly software solutions. With expertise in writing clean, testable code and debugging complex systems, I excel at collaborating with stakeholders and adhering to best practices to deliver high-performance applications. My background in education and accounting has sharpened my attention to detail, problem-solving skills, and ability to manage data effectively. Proficient in Git and Visual Studio Code, I leverage my technical expertise to streamline workflows, adapt to new challenges, and contribute to innovative technologies that solve critical business problems while driving growth and transformation."

PROFESSIONAL EXPERIENCE:

Invoice Executive – Waynsys IT Solutions Inc.   2022–2024
- Automated the preparation of financial reports using advanced spreadsheet functions, reducing the time spent on manual data entry by 15 hours each month, thereby allowing for more strategic financial analysis.
- Streamlined processes using Microsoft 365 tools, improving efficiency by 20%.
- Developed and maintained financial records for 50+ clients, ensuring compliance with regulatory standards; this initiative led to zero compliance issues during the annual audit process, fostering trust and reliability.

EDUCATION:

Bachelor of Arts in English Literature   *2018–2021*
P.N.C & K.R Degree College, Acharya Nagarjuna University

SKILLS:

• **Front-End Development**	:	HTML, CSS, JavaScript	• **Version Control** : Git and GitHub
• **JavaScript Frameworks**	:	React JS	• **Data base** : MYSQL with SQL
• **Developer Tools**	:	Visual Studio Code	

PROJECTS:

Roommate – React Web App Link 🚀
- Developed a **React-based web app** for PG and hostel listings, allowing users to browse accommodations.
- Implemented **React Router** for seamless navigation between pages.
- Designed an **interactive UI** with cards displaying PG details, images, pricing, and amenities.
- Integrated **search functionality** to filter PGs by name and location.
- Added **WhatsApp integration** for direct contact with property owners.
- Used **smooth animations** and UI enhancements for an improved user experience.
- Optimized for **mobile and desktop** with a **responsive design** and **shimmer effect** for polished loading.
- Ensured **fast performance** through efficient React rendering techniques.

Spotify Clone Link 🚀
- Built a **dynamic Spotify clone** with album track listings and search functionality.
- Utilized **HTML, CSS, and JavaScript** to create an interactive interface.
- Integrated **Spotify Web API** for real-time content updates.
- Optimized for **mobile and desktop** with a **fully responsive design**.

Simple House Website Link 🚀
- Designed a **responsive restaurant website** using **semantic HTML5 and Flexbox**.
- Integrated **interactive buttons, navigation links, and menu item displays** for better user engagement.
- Enhanced branding with a **professional footer, logo, and clean UI design**.
